Office Action Summary

Art Unit: 1712

Claims 4 and 5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 10.

Applicant's election with traverse of claims 2 and 3 in Paper No. 10 is acknowledged. The traversal is on the ground(s) that the common feature of the claims is a composition comprising polyolefin (PO) and polyphenylene sulfide (PPS). This is not found persuasive because the common feature must be an inventive concept for unity of invention to exist. As shown by the references of record compositions comprising PO and PPS are old and therefore, not an inventive concept.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 6 is indefinite in that it depends from nonelected claims 4 and 5, and in that it ends with "and." In claim 7, © should read (c).

Each of Serizawa, Japanese '339 and Japanese '502 teaches a thermoplastic composition comprising a polyolefin (PO) in amounts within the range of 55 to 89 % with a polyphenylene sulfide (PPS) in amounts within the range of 20 to 45 %. However, there is no teaching of how to obtain a composition within those ranges where the PPS forms the matrix or continuous phase and the PO forms the disperse phase.
